SHARE MANAGEMENT

SHARE MANAGEMENT

After a device is bound to your account through its Serial Number + Security Code, you can share the device with others.

- In the server list interface, tap 
- Enter the Email or phone number of the other party's account or scan the QRCode of the other party's account. Tap "Next Step".
- Select the device you want to share and then choose the function you want to share (live view or playback).
- Tap "Finish" to finish sharing.
- After the other party account receives the sharing message, enter the server list interface and tap  Sharing Management Shared by Others to go to the "Shared by Others" interface.
- Tap "Accept Sharing".

Note: one device can be shared with up to 10 friends.

After the account is logged in, "My Sharing" and "Shared by Others" can be viewed.

In the "My Sharing" interface, slide left on the sharing device name and tap the deletion button to cancel the sharing.

For the device shared by others, after it is added, tap Sharing Management >> Shared by Others to enter the "Shared by Others" interface and then tap "Accept Sharing" or "Accept All" to add devices to the server list. If you don't accept the sharing for 24hours, the sharing will be cancelled automatically.

TWO WAY TALK

SUPERLIVE PLUS

TWO WAY TALK

Tap on  at the bottom toolbar to enter the two-way talk setting interface.

You can choose to talk with a device (eg. a NVR/IPC directly added to the APP) or a channel (eg. a camera of a NVR).

Press and hold  to talk. Release to stop sending audio. Tap  to exit the two-way talk interface.

If your camera is an active deterrent camera (or an alert camera), you can switch the function of the speaker (talkback or alarm sound) by tapping .

If "Alarm sound" is selected, the speaker of the IPC will be used to play the warning voice.

Note: only some devices support two-way talk function. If the device you add doesn't support two-way talk, this function in the APP will not take effect.
